

IN THE CLAIMS:

1. (canceled)

2. (presently amended) ~~The composition of Claim 1 A composition comprising a charge tag attached to a terminal end of a nucleic acid molecule, said charge tag comprising a phosphate group and a positively charged moiety, wherein said charge tag further comprises a dye.~~

*sub
F1*
3. (original) The composition of Claim 2, wherein said dye is positioned between said nucleic acid and said positively charged moiety.

Ex
4. (original) The composition of Claim 2, wherein said positively charged moiety is positioned between said nucleic acid and said dye.

5. (canceled)

6. (presently amended) ~~The composition of Claim 4₂, wherein said charge tag has a net positive charge of 1 at pH 6-10.~~

7. (presently amended) ~~The composition of Claim 4₂, wherein said charge tag has a net positive charge of 2 at pH 6-10.~~

8. (canceled)

9. (presently amended) ~~The composition of Claim 8₂, wherein said nucleic acid molecule comprises a sequence complementary to a target nucleic acid, and wherein said charge tag further comprises one or more nucleotides that of said charge tag are not complementary to said target nucleic acid.~~

*sub
F1*
10. (presently amended) ~~The composition of Claim 4₂, wherein said nucleic acid comprises a first portion complementary to a target nucleic acid and a second portion that is not~~

*Sub
F1
Canc.*

complementary to said target nucleic acid, wherein said second portion comprises said terminal end.

11. (presently amended) The composition of Claim 42, wherein said nucleic acid and said charge tag have a combined net neutral charge and wherein said charge tag has a net positive charge.

12. (presently amended) The composition of Claim 42, wherein said nucleic acid and said charge tag have a combined net negative charge and wherein said charge tag has a net positive charge.

*Ex
Canc.*

13-14. (canceled)

15. (presently amended) The composition of Claim 42, wherein said charge tag contains a tertiary amine.

16. (presently amended) The composition of Claim 42, wherein said charge tag contains an ammonium group.

*Sub
F1*

17. (presently amended) The composition of Claim 42, wherein said charge tag further comprises a positively charged phosphoramidite.

18-22. (canceled)

*Sub
F1*

23. (presently amended) The composition of Claim 19, A composition comprising a positively charged phosphoramidite, wherein said phosphoramidite comprises an ammonium group.

24. (canceled)

~~25. (presently amended) The composition of Claim 19 A composition comprising a positively charged phosphoramidite, wherein said phosphoramidite has the structure:~~

wherein, X is a reactive phosphate group and Y is a protected hydroxyl group.

~~26-37. (canceled)~~

ET C2/3-4

~~38. (previously amended) A composition comprising a fluorescent dye directly bonded to a phosphate group, wherein said phosphate group is directly bonded to an amine group, wherein said composition comprises a charge tag, and wherein said fluorescent dye is contained within said charge tag.~~

Sub F1

~~39. (previously amended) The composition of Claim 38, wherein said fluorescent dye comprises Cy3.~~

Sub F1

~~40. (original) A mixture comprising a plurality of oligonucleotides, each oligonucleotide attached to a different charge tag, each of said charge tags comprising a phosphate group and a positively charged moiety.~~

Sub F1

~~41. (original) The mixture of Claim 40, wherein said plurality of oligonucleotides comprises four or more oligonucleotides, each attached to a different charge tag.~~

Sub F1

~~42. (original) The mixture of Claim 40, wherein said plurality of oligonucleotides comprises ten or more oligonucleotides, each attached to a different charge tag.~~

Sub F1

~~43. (original) The mixture of Claim 40, wherein said plurality of oligonucleotides comprises twenty or more oligonucleotides, each attached to a different charge tag.~~

BEST AVAILABLE COPY

44. (original) The mixture of Claim 40, wherein said plurality of oligonucleotides comprises fifty or more oligonucleotides, each attached to a different charge tag.

45. (original) The mixture of Claim 40, wherein said charge tags comprise a dye.

46. (original) The mixture of Claim 40, wherein said charge tags comprise a second positively charged moiety.

47. (original) The mixture of Claim 40, wherein said charge tags further comprise one or more nucleotides.

48. (original) The mixture of Claim 40, wherein each of said oligonucleotides attached to a charge tag have a combined net neutral charge and wherein said charge tag has a net positive charge.

49. (renumbered from a duplicate original claim 48) The mixture of Claim 40, wherein each of said oligonucleotides attached to a charge tag have a combined net negative charge and wherein said charge tag has a net positive charge.

50. (renumbered from original claim 49) The mixture of Claim 40, wherein said charge tags comprise a positively charged phosphoramidite.

51. (renumbered from original claim 50) The mixture of Claim 40, wherein said charge tags comprise a neutral phosphoramidite.

51-85. (canceled)
